

## Fuori

The Fuori is the last word in ultra modern styling and convenience. Taming the true nature of fire, the Fuori offers a beautiful natural flame that burns from a pure white pumice fuel bed.

The Fuori comes in 3 standard sizes and can be purchased either as a sunken burner appliance that can be installed into your own purpose made opening to decorate to your own style or in a plain box with or without a four sided brushed stainless steel trim.

The Fuori is controlled by the very reliable, high quality Mertik GV 60 full sequence remote control valve which offers the latest in safety and dependability. With the flexibility of installation and option to have the additional fuel bed features Driftwood or Pebble, the Fuori is an ideal choice to ensure a unique focal point in your home.

### Fuori Features:
